Kanika was sad to see that there were no flowers blooming in the pond. Also, there were hardly any fish in it. She noticed that some women were washing clothes and some people were bathing their cattle in the pond.

She could now understand that it was such pollution that had made pond water unfit for the fish and the flowers. She shared her concern with her grandparents. They assured her that they would ask the village panchayat to take steps to reduce the pollution of the pond water.
