Class III

ASSIGNMENT

Subject - English

Q1. Read the passage carefully and answer the following questions.

Pranayam is control and extension of the breath. By practising it, we can reduce our breathing rate. Reduced breathing rate has a lot of benefits. It slows down heart rate, reduces blood pressure and relaxes body and mind. Pranayam increases our life expectancy. Pranayam should be done on an empty stomach, preferably in the morning. You can also do it in the evening but there should be a gap of four hours after the last meal.

Q.1 What is Pranayam?

Q.2 What are the benefits of reduced breathing rate?

Q.3 How should Pranayam be done?

Q.4 When should we do Pranayam?

Q.5 How many hours of gap should be after the last meal?
